

NICOLAS MELMS

FRONT-END DEVELOPER

About Me

It took me a while to find my true passion in life but I'm glad I found the path of web development. The constant cycle of learning new things and using these tools to build more projects in the future keeps me interested and motivated. I've learned a lot along my development journey and I'm excited to start working on a team! Collaborating with other developers is something I'm really looking forward to.

Below are a few of my projects that showcase my skills and general knowledge in web development.

Projects

Explore National Parks (<https://nmelmsnps.netlify.app/>)

- Uses a free API provided by the National Park Service.
- Used Fetch to make request to the API.
- Tested using Jest and React Testing Library.
- Used a mobile first approach to make this site fully responsive.
- Uses modern CSS and semantic HTML

Invoice App (<https://nmelmsinvoice.netlify.app/>)

- CRUD app built using React and Firebase.
- Design was provided via Figma file and provides a nice looking UI.
- Uses the Context API to help with passing props.
- Used the Formik library to assist with the long forms.
- Responsive mobile first design

Planet Facts (<https://nmelmsplanetfacts.netlify.app/>)

- Displays planet facts from Wikipedia.
- Built using React and React-Router.
- Uses mobile first design and responsive design practices.

Education

St. Petersburg College

2019 to 2021

Computer Programming and Analysis
